John B. Finlay John B. Finlay (9 September 1853 – 7 February 1922) was a U.S. politician from Eastman, New York. In the 1898 presidential election, Finlay was the Liberal Party's candidate for President of the United States, receiving 20,118 votes (2.37%) statewide. In that election, the Liberal Party nominated its candidate after the Democrats left the race, which resulted in a potentially significant number of spoilt ballots for Finlay in the Empire State. Finlay was an unsuccessful candidate for election in 1900 to the 56th United States Congress, but did serve as Chairman of the New York State Democratic Committee in 1902. In 1902, he served as U.S. Representative from New York's 33rd district, having been elected on the Fusion ticket. He was re-elected in 1904. Finlay was an unsuccessful candidate for election in 1906 to the 58th United States Congress, but was an unsuccessful candidate for election in 1908 to the 59th United States Congress, and for election in 1910 to the 60th United States Congress. Mental health services in the criminal justice system: adapting to a changing legal context. The rule of law includes the requirement that persons accused of crimes are granted the rights to a trial and an attorney. As a result, the legal support of persons accused of crimes has long been provided by courts and law enforcement agencies. However, when a person's mental state is used as a basis for a conviction in criminal court, the legal process is not necessarily the appropriate setting to address that individual's mental health concerns. In fact, in some states there are specific legal requirements that prohibit the involvement of mental health professionals in the adjudication process, including reports that could lead to an involuntary examination and treatment. In spite of these barriers, service providers in the criminal justice system must make efforts to ensure that people charged with criminal offenses have access to essential resources. This article discusses issues related to the legal and mental health systems and provides suggestions about strategies that can maximize the delivery of mental health services to persons with serious mental illness who are accused of a crime.Q: How to handle PHP's PHPExcel_Worksheet _TagHandler error? A: Check the PHPExcel_Writer_Excel2007 constant in your PHP code. I believe that it is a default constant for a class that is hidden by default, so you need to include it like this: require_once("PHPExcel/Writer/Excel2007.php"); First, a disclaimer: Yes, I'm talking about his relationship with the pen, not his own sexuality. Please, for your sake and ours, let's at least be clear about the distinction here. Second, I'm looking at the photos as a former graphic designer, and the look of the bullet point is, to my eye, very much inspired by the look of actual (and very fancy) mechanical pens. But a stylized, conceptualized look that actually looks like what it's meant to be? Actually very cool
